

April 12, 2020

All,

As of yesterday's report, Greenwood County had 1 additional confirmed case in the county for a total of 17 cases confirmed since 21 March. *Remember this is only those which have been confirmed and is for those who were tested a minimum of two days ago. This means there are others who have been tested and are in quarantine awaiting results. Additionally, an individual can be asymptomatic, (contagious but shows no symptoms), who would not meet the criteria to be tested.*

The first three cases in Greenwood County were reported over 15 days ago, so there are 3 individuals who should have recovered from the virus. This brings Greenwood County's remaining total of active confirmed cases to 14. *DHEC does not track recovered individuals, so this number is an estimate based on the following: Most individuals recover from the virus within this time frame; no deaths have been reported for Greenwood County.*

SCDHEC reported an additional 144 new cases in the state for a total of 3,207. Also, they reported 8 new deaths in three counties for a total of 80; Beaufort(1), Clarendon(1), Dorchester(1), Florence(1), Greenville(2), Kershaw(1) and York(1). 2 deaths were middle aged individuals who had underlying health issues and 5 were elderly individuals with underlying health issues. One other elderly person's death is still under investigation for underlying health conditions. To view additional information, see [DHEC's map page](#).

The 10 April test results listed on DHEC's media release are incorrect. I will update the numbers in tomorrow's report once they are corrected.
